

# AUTODAFEH

## - Act of Faith

CD & Digital Album

### Never Stop the EBM!

Fans of **Autodafeh** never have to wait very long for more brilliance from this Swedish trio. Only a little more than a year has gone by since the band released their last album... and once again, the men deliver a new full length album. Not losing touch with their EBM "roots", this album continues to follow in the footsteps of bands like **Front 242**, but they also make a point to make their own place in history by moving in some new directions. *Act of Faith* offers some hart hitting, slightly "darker" edge and also some softer, more Synthpop flavor as well.

*Act of Faith* is sure to please the fans, and bring in new fans worldwide! The album has been licensed for European release by Scanner Records, and Sigsaly Transmissions to release in all other territories.

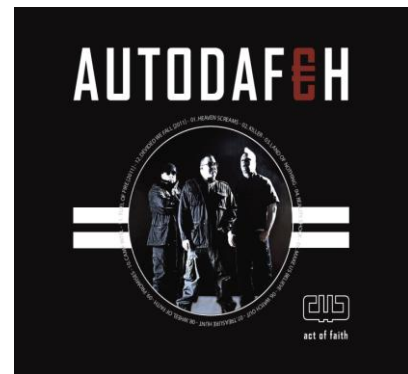

#### **Autodafeh:**

Home based in Sweden, Autodafeh is a trio consisting of Mika Rossi, Jesper Nilsson, and Anders Olsson. After their debut album and EP releases found massive success in the European underground charts, the men have been traveling performing live for the ever growing fan base. They have gone from being the supporting act for inspirational artists such as Front 242, to now being themselves the headliner act.
